CONTENTS

35 **Nitrogen in steels** D. T. Llewellyn

42 **Pelletising–sintering, prereduction, and smelting of Greek chromite ores and concentrates** H. G. Vazarlis and A. Lekatou

54 **Mould–strand interaction in continuous casting of steel billets: Part 1 Industrial trials** I. A. Bakshi, J. L. Brendzy, N. Walker, S. Chandra, I. V. Samarasekera, and J. K. Brimacombe

63 **Mould–strand interaction in continuous casting of steel billets: Part 2 Lubrication and oscillation mark formation** J. L. Brendzy, I. A. Bakshi, I. V. Samarasekera, and J. K. Brimacombe

75 **In plant assessment of steel cleanliness in continuously cast slabs and hot rolled coils** J. Dijk, D. Manneveld, and J. M. Rabenberg

97 **Use of rare earth oxide tracers in determination of inclusion sources and origins at British Steel, Scunthorpe Works** T. H. English, D. J. Dyson, K. D. Walker, and T. J. Pike

104 **Mould–strand interaction in continuous casting of steel billets: Part 3 Mould heat transfer and taper** S. Chandra, J. K. Brimacombe, and I. V. Samarasekera

113 **Mathematical modelling of heat flow and deformation during rough rolling** W. C. Chen, I. V. Samarasekera, A. Kumar, and E. B. Hawbolt

126 **Residual enrichment effects in continuous casting** P. J. Lewis

Special focus on recent developments in iron ore sintering

135 **Part 1 Introduction** P. R. Dawson

137 **Part 2 Research studies on sintering and sinter quality** P. R. Dawson

144 **Part 3 Granulation and strand feeding** P. R. Dawson

150 **Part 4 The sintering process** P. R. Dawson

---

168 ***IoM Presidential Address*** **Building bridges** J. Collyear

172 ***Opening address*** **Total quality in the steel industry** B. Moffat

173 **Metallographic clues to the origin of an eighteenth century cannon** D. A. Melford

179 **Reduction of FeO dissolved in $CaO–SiO_2–Al_2O_3$ slags by Fe–C droplets** G. G. Krishna Murthy, Y. Sawada, and J. F. Elliott

191 **Reduction rates of FeO in $CaO–SiO_2–Al_2O_3–X$ slags by Fe–C droplets** G. G. Krishna Murthy, A. Hasham, and U. B. Pal

201 **Thermal conductivity, thermal diffusivity, and specific heat of slags containing iron oxides** M. Susa, F. Li, and K. Nagata

207 **Disintegration of blast furnace deadman coke due to molten FeO** K. Sunahara, T. Inada, and Y. Iwanaga

215 **Development of direct analysis method for molten iron in converter – hotspot radiation spectrometry** K. Chiba, A. Ono, M. Saeki, M. Yamauchi, M. Kanamoto, and T. Ohno

221 **Physical modelling of steel flow in continuous casting tundish** S. Singh and S. C. Koria

236 **A car maker's experience with precoated steel** N. Heath

241 **The Chinese iron and steel industry in the 1990s** Yin Ruiyu

246 ***Opening address*** **Total quality in the steel industry: the challenge** J. W. Edington

Special focus on modelling of metal rolling processes

254 **Modelling for geometrical control in cold and hot rolling** P. Montmitonnet, E. Massoni, M. Vacance, G. Sola, and P. Gratacos

261 ***Extended abstract*** **Finite element modelling of section rolling** P. Hartley, S. W. Wen, I. Pillinger, C. E. N. Sturgess, and D. Petty

264 ***Extended abstract*** **Rolling characteristics of continuously cast slabs with liquid core** B. Cremer, O. Pawelski, and W. Rasp

267 **Systematic roll pass design for rolling of sharp corner squares** S.-E. Lundberg

273 ***Extended abstract*** **Modelling of hot strip cross-sectional profile at Krupp Stahl** L. Ricken, E. Raquet, and S. Bartel

275 ***Extended abstract*** **Geometrical effects of large reductions in first stands of finishing mill** C. Reimer and R. L. Huisman

280 ***Extended abstract*** **Quality improvement using process control model at British Steel Lackenby universal beam mill** J. D. Jennings, K. Backhaus, R. Krengel, W. Runde, and D. Schulze

283 ***Extended abstract*** **Geometrical control with universal crown control 6 high mill** P. J. Reeve and M. S. Lubomirski

286 **Dynamic mill simulator** I. R. McDonald, P. D. Spooner, R. Cockerell, W. J. Edwards, and P. J. Thomas

293 **Use of granulated blast furnace slag for stabilisation of steelmaking flue dust** F. A. Lopez, E. Sainz, and A. Formoso

298 **Solubility of nitrogen in liquid steel in plasma induction reactor** L. B. McFeaters, J. J. Moore, and B. J. Welch

307 ***Technical note*** **Viscosity–composition diagram for casting powders** V. K. Gupta and A. K. Santra

312 **Direct measurement of nitrogen in liquid steel** J. Plessers and W. Clay

315 **The African iron and steel industry** V. Bobrov

333 **Development, current and future use of Steel 91** J. Orr and D. Burton

338 **Boron in steels** D. T. Llewellyn

344 **Evaluation of alloy cleanness using cold crucible melting** L. Barnard, R. F. Brooks, P. N. Quested, and K. C. Mills

350 **Mathematical model for tall coke oven battery: Part 1 Development of thermal model for heat transfer within oven charge** E. J. Osinski, P. V. Barr, and J. K. Brimacombe

362 **Reduction of iron ore fines with coal fines** T. Sharma

366 **Kinetic studies on deoxidation of aluminium killed low carbon steels using synthetic fluxes** F. Patsiogiannis, U. B. Pal, M. B. Mourao, and R. S. Bogan

372 **Absorption coefficients and refractive indices of synthetic glassy slags containing transition metal oxides** M. Susa, K. Nagata, and K. C. Mills

379 **Finite element model for analysing liquid slag development during continuous casting of round bars** M. B. Goldschmit, J. C. González, and E. N. Dvorkin

386 **Improving efficiency of dc arc furnace using oxyfuel burners cum lances and auxiliary electrodes** S. P. S. Sabharwal, P. K. Chaudhuri, and S. M. Aeron

390 **Dynamic modelling and control of vacuum circulation process** B. Kleimt, S. Köhle, H. J. Ponten, W. Matissik, and D. Schewe

401 **Process control for electric arc furnaces** P. A. Vázquez and L. Hultin

403 **Hoogovens' training system** H. Wagendorp

415 **Sensitivity of microstructure and mechanical properties of Steel 91 to initial heat treatments** J. Orr, D. Burton, and C. Rasche

424 **Effect of compositional variations on properties of Steel 91** J. Orr and A. Di Gianfrancesco

431 **Experience in data collection and assessment for material standards** J. Orr and D. Burton

438 **Gloom or boom? Future prospects for steel demand in UK** M. Evans and S. B. Walton

442 **Removal of inclusions from steel by halide salt treatment** S. B. Singh and A. K. Chakrabarti

445 **Influence of vanadium on hot ductility of steel** B. Mintz and R. Abushosha

453 **Mathematical model for tall coke oven battery: Part 2 Calculation of gas flow and related phenomena for oven charge** E. J. Osinski, P. V. Barr, and J. K. Brimacombe

469 **Synchronising free energy data on reactions in liquid Fe–Mn–O and solid Mn–S–O systems** E. T. Turkdogan

476 **Slag compositions for ferromanganese making blast furnaces** Xuegong Bi, Shizhuo Zhou, Shifan Wu, and Genxue Xi

482 **Physicochemical study of presence of Fe^{2+} ion in pyroconsolidated magnetite pellets** S. Ferreira, D. Siguín, and F. García

485 **Fluid flow characterisation in twin strand continuous casting tundish water model** S. K. Sinha, K. M. Godiwalla, and C. S. Sivaramakrishnan
